

# TABLE OF CONTENTS

<b>On the Opening Page</b> Avraham Duvdevani	3	<b>From the Field</b>	
<b>Editorial</b> Gilad Ostrovsky	4	<b>The importance of KKL-JNF Long Term Ecological Research sites using adaptive management to control ecosystem processes in the light of climate change</b>	82
<b>Preparing forest management in Israel for climate change</b> Shani Rohatyn-Blitz, Gilad Ostrovsky	5	Shayli Dor-Haim, Yagil Osem, Tamir Klein, Eli Argaman, Nitzan Segev, Asaf Karavani	
<b>Reviews</b>		<b>Evaluating scientific and applied methods and tools for predicting, preventing and extinguishing forest fires</b>	90
<b>The climate crisis – drivers, effects, future scenarios and potential solutions</b> Avner Gross	8	Mor Ashkenazi, Maya Milet, Naomi Huminer, Moni Shitrit, Ken Karu, Revital Weis, Chanoch Zoref	
<b>Forests' response to gradual climate change and increased frequency of extreme events – a global and local perspective</b> Yakir Preisler, Yotam Zait	15	<b>Analysis of the fire on Mount HaRu'ah (HaHamisha Forest) on June 2021</b>	94
<b>The unexpected water cycle during the summer in the Negev</b> Nurit Agam, Moshe Shachak	28	Roni Tal, Anat Eidelman, Almog Ram	
<b>Original Articles</b>		<b>Limans on roadsides in the Negev – an update</b>	97
<b>Selection of drought-resistant <i>Cupressus sempervirens</i> trees and improving the method of vegetative propagation by cuttings to allow the selected trees to be used for forest plantings</b> Joseph Riov, Hadas Regev, Moshe Huberman	38	Gil Siaki	
<b>A hidden mechanism of forest loss under climate change: The role of drought in eliminating forest regeneration at the edge of its distribution</b> Ella Pozner, Peleg Bar-On, Stav Livne-Luzon, Uri Moran, Mor Tsamir-Rimon, Efrat Dener, Efrat Schwartz, Eyal Rotenberg, Fyodor Tatarinov, Yakir Preisler, Nitai Zecharia, Yagil Osem, Dan Yakir, Tamir Klein	49	<b><i>Vachellia</i> (Acacia) tree development and growth in acclimation plots in the Negev</b>	100
<b>The affinity between survival and perennial radial-growth pattern in <i>Pinus brutia</i></b> Rotem Attias, Omer Golan, Asaf Alon, Maor Elron, Lior Regev, Elisabetta Boaretto, Shai Tamari, Zvi Mendel, Rakefet David-Schwartz	60	Tamar Cafri, Denis Loshkovoy, Gilad Riesfeld	
<b>Bark beetle-related pine mortality in Israeli planted forests and the effect of trap trees</b> Omer Golan, Rotem Attias, Maor Elron, Alexie Protasov, Zvi Mendel, Rakefet David-Schwartz	71	<b>Opinions</b>	
		<b>Cultural ecosystem services from Israel's pine forests in the light of climate change: Continuing to enjoy a different kind of forest</b>	104
		Daniel E. Orenstein	
		<b>Very Short Notes</b>	
		<b>The climate-forest project for responsible urban afforestation</b>	108
		Daniel Katz	
		<b>A Forest of Books</b>	
		<b>Collapse by Jared Diamond, 2008</b>	
		<b>The Tree by John Fowles, 1979</b>	110
		Gilad Ostrovsky	
		<b>Know Your Trees</b>	
		<b><i>Vachellia raddiana</i> in "Sayeret Shaked" Park</b>	113
		Hagay Yavlovich	
		<b>English Abstracts</b>	III

Cover picture

Front cover

Yatir Forest - dense conifer forest. At its center is a young plantation of low-density broad-leaved species. Is this the future for southern forests as a result of climate change?

May 2022

Photo: Roby Yahav

Back cover:

The photo on the front cover was taken from this exposed hill in the Yatir Forest. The difference between the native vegetation and the planted forest is clearly visible.
